

## XLH

Single light profile  
Pendant, Surface & Tracklight available

## XLH UP/DOWN

Double light profile  
Pendant & Tracklight available

# Modern and modular.

You might recognize this as the Alupro LED profile, or you could be acquainted with it as a complete fixture. Our expanded LED profile and fully developed, standardized, yet customizable XLH and XLH up-down fixtures. These are meticulously put together using our Alupro LED profiles and can be personalized down to the finest details to perfectly match the needs of each project.

The XLH and XLH up-down fixtures are impressively versatile solutions. Thanks to their standardized yet customizable design, they can adapt to a wide array of requirements. The entire fixture is assembled from various components in our assembly department. This exquisitely modern design is frequently chosen for use in office and retail projects. The XLH can operate as a pendant, track or a surface-mounted fixture, and is available in sizes of 0.9m, 1.2m, and 1.5 meter. The XLH and XLH up down boasts a specialized linear LED module, which can achieve a CRI of 90 in light colors like 3000K, 3500K, and 4000K. In the Bioup option, it can offer 4200K or Bioup + Tunable White with a CRI of 80.

For both fixtures, it's possible to equip them with Casambi to offer increased comfort and control. Furthermore, through their LED module, they can be equipped with a Tunable White and Bioup module, providing quality human-centric lighting for offices. This lighting follows the biodynamic rhythm and, in combination with Bioup, can even stimulate the production of the happiness hormone.

For the XLH and XLH up-down models, you can choose between a standard opal finish or a micro-prismatic cover. If you decide to equip the XLH or XLH up-down with Casambi, you can also incorporate external sensors to enhance safety and efficiency, especially in common areas.
