

LUCIO

SURFACE OR PENDANT

A flexible and energy-efficient system designed specifically for projects where the desire is to adjust lighting and design at any given moment. Featuring a special dipswitch for light colors, a dipswitch for light output, and a flexible design allowing the top of the luminaire to be fitted with an uplight or blind plate, this luminaire is suitable for use in offices, public spaces, retail, and hospitality.

FLEXIBLE LIGHTING WITH EYE FOR THE LONG TERM

With its special dipswitch technology, Lucio offers an advanced lighting experience. With various settings for light output and three color temperatures (3000K, 3500K, 4000K), you can easily create the desired ambiance, while the power of the luminaires is precisely tailored to their length. This means you can always rely on the perfect amount of light, regardless of the size of the space or the desired ambiance.

The Lucio is renowned for its flexibility. The luminaire is designed with adaptability in mind, making it perfect for those who like to have control over their lighting. With the included blind plate and the option to easily upgrade to an uplight, Lucio effortlessly adapts to evolving needs. Whether you prefer direct lighting or want to create an indirect, atmospheric glow on the ceiling, Lucio offers the flexibility to meet your preferences.

LUCIO

CASAMBI

STANDARD DALI 2 DIMMABLE

UP LIGHT OPTION

The blank plate of the Lucio comes standard with the luminaire. It can be easily exchanged with the uplight with just one click as desired. The uplight provides indirect light at the top of the luminaire and is also available in black for all sizes. In the uplight variant, the light output of the Lucio is distributed, with 70% accounting for direct light at the bottom and 30% for the uplight. The light color of the uplight matches that of the direct light

ENERGY EFFICIENT UP TO 121 LM/W

CONNECT MULTIPLE LUCIOS

Connect multiple Lucio fixtures with our special connection pieces and create a seamless design. With the option to add a 15 meter roll of opal finish, you make your design an aesthetic whole.

COLOURS

DIPSWITCH

Special dip switch on the top of the fixture with the option to switch between light colors 3000K, 3500K and 4000K. Light output can be controlled on the driver.
