

CREATE EMOTIONS
WITH LIGHTING

-  Experience optimal comfort
-  Quick integration with Dialux
-  Personalize with Casambi
-  Demo box for each series
-  Customize your fixture yourself!

Become a lighting experience master

With Nuudo fixtures, you can create the perfect atmosphere and ambiance for any occasion. Each fixture offers unique and customizable lighting options that can be applied in various spaces, whether for residential, renovation, or hospitality purposes.

The fixtures can be quickly integrated with Dialux through our 3D and Ltd. files. Casambi allows you to create a haven of tranquility and set personalized light scenes. This enables you to adjust the brightness, color temperature, and timing to achieve the perfect lighting effect, supported by Nuudo's high CRI, low glare, and material finishing.

By allowing you to assemble and personalize your fixture according to your preferences, you can make a statement and showcase your unique taste and personality. The versatility and flexibility of Nuudo fixtures make them a perfect choice for any project where the goal is to create an inspiring design and optimal experience, regardless of its size.

When using traditional lighting, you may struggle to create the perfect atmosphere and mood in your space without providing comfort due to low CRI. This can lead to an undesirable experience that can disappoint customers or guests.

Do you want to learn more about Nuudo fixtures and how they can transform your space? Visit our website or request a demo box today!
